

Bringing up new eco-scientists

AN ERASMUS+ PROGRAM

2nd PROJECT MEETING
AT THE INSTITUT
RAMON DE LA TORRE

NewsLetter 1

Institute Ramon de la Torre, being the coordinating school of the European Erasmus+ project “Bringing Up New Eco Scientists”, has hosted the second transnational project meeting from 8 to 11 November. This meeting was useful to plan and organize the different activities to be carried out during the development of the project, which lasts for two years.

Co-funded by the
Erasmus+ Programme
of the European Union

”

ABOUT THE PROJECT

The "Bringing Up New Eco-Scientists" project intends to exchange good practices in the fields of recycling, R.E.S. and the reduction of energy consumption after calculating the ecological footprint and the energy efficiency of the partners schools. We mean to upgrade the teaching and learning quality focusing on the scientific area (mathematics, science and technology) and to provide a holistic view on our future existence. In addition, getting to know good practices, within an environmental approach, used in enterprises throughout Europe will contribute to make students realize both the need for adjustment to the labor market's demands and the need for a continuous development of good practices through lifelong learning.

The outcomes of this partnership will be mainly fostering the exchange of good practices all over Europe regarding the environmental education. The project outputs will be surveys contacted by all partners and a series of learning activities (workshops, laboratory activities and visits) organized by each school in relation to specific environmental topics.

The partners are 5 schools of secondary education from Spain, Greece, Italy, France and Bulgaria

NewsLetter 1

Articles from the Catalan daily paper ('Diari de Tarragona'), based on the Erasmus 'Beecos' project have reflected the warm welcome given to the teams of the five participating schools. They were received by the municipality of Torredembarra and later by the department of education in Tarragona.

The Catalan authorities have shown particular interest in innovation and the exchange of good practices that these types of projects can bring to the educational community as a whole.

IREC
Institut de Recerca en Energia de Catalunya
Catalonia Institute for Energy Research

With this in mind, a workshop was also organised at the Institute of Energy Research at the 'Rovari University I Virgili' of Tarragona, which is a cutting-edge research center that works in close contact with both local and national companies, particularly on issues to do with energy saving.

SINCE THE BEGINNING...

As soon as BEECOS project was approved, each partner-school started the relevant activities for the implementation of the project. Our first tasks during the first days were to present and share information for the project with the teachers' community, the whole school community, with the local community through local press and media.

We presented briefly the project's idea, partner schools, tasks, target group and activities that our school would be involved in, during the project's implementation.

LOGO CONTEST

According to the project each partner- school organized a logo contest in the school and after that the Bulgarian school was responsible for the online logo contest among our five schools.

We used Instagram and after the logo contest we continue supporting the BEECOS Instagram profile with photos:

NewsLetter 1

Final results at 8 p.m. CET on 8th of December 2017:

1st place: 1408 likes for the French logo

2nd place: 1329 likes for the Italian logo

3th place: 325 likes for the Greek logo

4th place: 234 likes for the Bulgarian logo

5th place: 183 likes for the Spanish logo

In total:

3479 likes

and

347 followers in Instagram

Congratulations to the French team and the artists!

Facebook profile

We also created our BEECOS Facebook profile where each of the partners can upload information, photos and events.

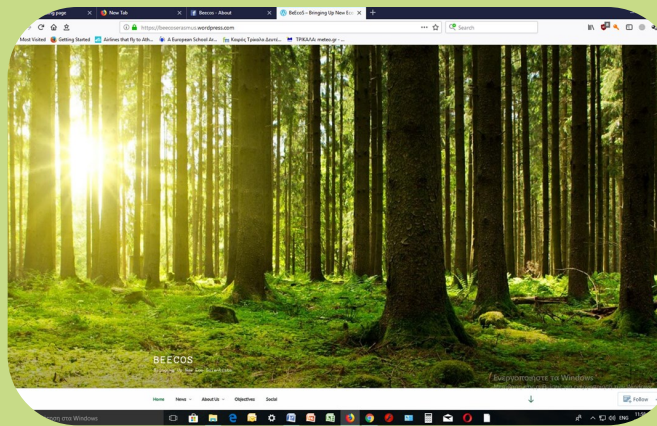

https://www.facebook.com/beecosproject/?modal=admin_todo_tour

BEECOS project website

We created the BEECOS project website

<https://beecoseras-mus.wordpress.com/>

Moreover, the Bulgarian school created a BEECOS project webpage in Bulgarian language, in order to share information about the project in their mother tongue.

The European waste reduction week, which promotes awareness on its proper disposal, will take place from 20th to 25th November.

BEECOS ETWINNING
SPACE:

The project was also initiated
in the eTwinning platform!

[https://
twinspace.etwinning.net/49766/
home](https://twinspace.etwinning.net/49766/home)

Each school created three videos :

- 1) Presenting their home town
- 2) Presenting their school
- 3) Suggesting best recycling habits at home!
