

# “Bringing up new eco-scientists”

2017-1-ES01- KA219-037977

In case you were wondering what the students learned in  
Tryavna,

Bulgaria, see all the workshops and educational visits summarized in

[This video!](#)

Memories from the previous meetings “keep rolling”

## The 4th Learning Activities Meeting, 3-9 February 2019:

Parma, in the North of Italy at Liceo Attilio Bertolucci.

In brief:

The French school produced the video of the activities and workshops relevant to the project 's objectives in Parma.

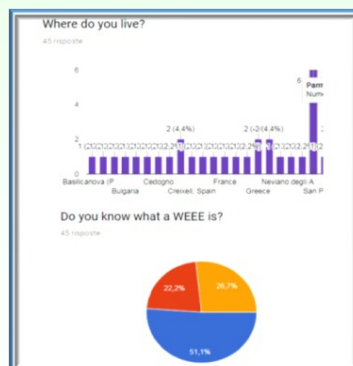

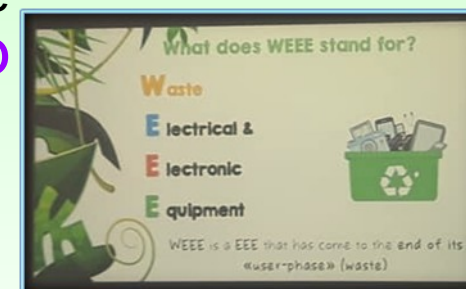

In detail:

This meeting focused on the recycling of cell phones, electronics and electrical appliances. See presentation here:

A relevant questionnaire was also made by **ECODOM** in cooperation with **LICEO ATTILIO BERTOLUCCI**.

See the results here

This material was enriched by visiting a *relevant recycling center* on site

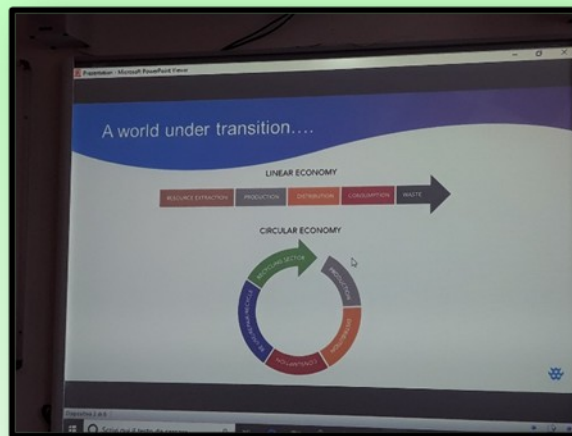

and teamwork at a local Fab Lab (*Digital Building Technologies Laboratory*)

Specialists explained the need for the transition from the **Linear to the Circular economy** that aims to "reuse" the "waste", creating a new life cycle to avoid depletion of natural resources.

This type of economy has to be applied globally.

At the same time, referring to personal professional experiences, they presented to the students **"green" professions** related to environmental protection and sustainable development and with increased demand in the labor market. In this way, the program was linked to the professional orientation of the pupils.

Students designed **posters** to promote recycling in their schools.

Through the **recording of the ecological footprint of the schools** involved, pupils concluded that changes are necessary, both in individual and collective behavior and in the consumption of energy resources. They even suggested to request the assistance of School and Local Authorities in order to achieve their goal.

In the town hall, environmental councilor Tiziana Benassi presented the environmental policy implemented by the municipality.

## Educational Visits

The monitoring of all the processing of local fresh milk for the production of the famous cheese, trademark of Parma, **Parmigiano Reggiano**.

The visit in the production line of **the Barilla plant**, the world's largest pasta factory.

## Cultural Visits

Parma is chosen as the cultural capital of Italy for 2020.

Some of the reasons are:

It is music and opera - moreover two great composers, Giuseppe Verdi and Arturo Toscanini, originate from Parma,- art in every form - with the works of the famous Renaissance painters, Parmigianino and Correggio – it is the architectural masterpieces from the Middle Ages and the Renaissance and the Baroque style as revealed in **the cathedral**, the octagonal baptistery, **the wooden structure of the Farnese Theater** and the Palazzo della Pilotta.

## Certificates and Farewell party

Certificates were given and well-known musical pieces were performed by the unique **Comboband** of the hosting school.

**Alice Belodi, Paola Beneventi** and **Maria Saponaro**, you organized an unforgettable experience!!!
